

Brainstorming & Idea Prioritization

Project Name

ShopEZ – MERN Stack E-Commerce Application

Prepared By: Sameena Tanwaz

Phase: Brainstorming & Ideation

Date: 17 June 2026

1. Introduction

The Brainstorming and Ideation phase focuses on identifying challenges faced by online shoppers and e-commerce businesses and generating innovative solutions to address these issues. The objective is to explore multiple ideas and prioritize features that provide maximum value to users.

ShopEZ is designed as a MERN Stack E-Commerce Application that enables users to browse products, manage shopping carts, place orders, and allows administrators to manage products, orders, and users efficiently.

2. Problem Statement

Many customers face difficulties while shopping online due to poor user experience, limited product discovery, lack of centralized management, and inefficient order tracking. Small businesses also require affordable and scalable e-commerce solutions to sell products online.

The objective of ShopEZ is to provide a modern, user-friendly, and scalable e-commerce platform that simplifies online shopping and store management.

3. Idea Generation

Idea ID	Idea Description
I1	User Registration and Login System
I2	Product Catalog Management
I3	Product Search Functionality
I4	Category-Based Product Filtering

Idea ID	Idea Description
---------	------------------

I5	Shopping Cart Management
I6	Order Placement and Tracking
I7	User Profile Management
I8	Admin Dashboard
I9	Product Management Module
I10	Order Management Module
I11	User Management Module
I12	Responsive User Interface

4. Idea Prioritization (MoSCoW Method)

Must Have

- User Authentication
- Product Catalog
- Shopping Cart
- Order Placement
- Admin Dashboard
- Product Management

Should Have

- Product Search
- Category Filtering
- User Profile Management
- Order Tracking

Could Have

- Product Reviews
- Wishlist
- Product Recommendations

Won't Have (Current Version)

- AI-Based Recommendations
 - Multi-Vendor Marketplace
 - Online Payment Gateway Integration
-

5. Selected Solution

After evaluating various ideas, the selected solution is **ShopEZ**, a MERN Stack E-Commerce Application that provides:

- User Registration and Login
 - Product Browsing
 - Product Search and Filtering
 - Shopping Cart Functionality
 - Order Management
 - User Profile Management
 - Admin Dashboard
 - Product and User Management
-

6. Benefits of the Proposed Solution

- Improves shopping experience.
 - Simplifies product discovery.
 - Enables efficient order management.
 - Provides centralized administration.
 - Offers scalable architecture using MERN Stack.
 - Supports future feature enhancements.
-

7. Conclusion

The brainstorming and prioritization process helped identify the key requirements and functionalities required for the ShopEZ E-Commerce Application. The selected features

provide a strong foundation for building a scalable and user-friendly e-commerce platform.
