

Project Design Phase-II

Data Flow Diagram & User Stories

ShopEZ Data Flow Diagram

1. User registers or logs into the ShopEZ application.
2. User browses products and searches for required items.
3. Product data is fetched from the MongoDB database.
4. User adds products to the shopping cart.
5. Cart information is stored and updated in the database.
6. User places an order and submits payment details.
7. Order information is processed by the backend server.
8. Admin manages products, users, and orders through the admin dashboard.
9. Updated information is stored in MongoDB and displayed to users.

User Stories Table

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Web User)	Registration	USN-1	As a user, I can register using email and password.	Account created successfully.	High	Sprint-1
Customer (Web User)	Login	USN-2	As a user, I can log in securely.	User accesses dashboard.	High	Sprint-1
Customer (Web User)	Product Catalog	USN-3	As a user, I can browse products.	Products displayed correctly.	High	Sprint-2

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Web User)	Search Products	USN-4	As a user, I can search products by keyword.	Relevant products displayed.	Medium	Sprint-2
Customer (Web User)	Shopping Cart	USN-5	As a user, I can add/remove products from cart.	Cart updates successfully.	High	Sprint-3
Customer (Web User)	Profile Management	USN-6	As a user, I can view my profile.	Profile information displayed.	Medium	Sprint-3
Administrator	Product Management	USN-7	As an admin, I can add, edit, and delete products.	Product database updated.	High	Sprint-4
Administrator	Order Management	USN-8	As an admin, I can manage customer orders.	Orders updated successfully.	High	Sprint-4
Administrator	User Management	USN-9	As an admin, I can view registered users.	User list displayed.	Medium	Sprint-4
